

Winning in January

improving product availability

This toolkit is developed with input from the following companies

This document provides guidance for improving product availability and delivering improved shopper satisfaction in the summer period generally and January in particular . It is an adjunct, not an alternative, to the detailed internal and trading partner planning and deployment for January.

January Historically

The general trend reported by retailers / wholesalers was a **4 to 5%** reduction in service level across the industry.

There are significant sales growth and customer service improvement opportunities in January.

January Considerations

The month of January is under pressure from a number of independent and significant factors.

- Increase in public holidays leading into and throughout January.
- A change in season / weather.
- High proportion of annual leave taken.
- More production facility shutdowns.
- Less reliable transport offerings.
- Financial year end for many companies.

January Outcomes

SUPPLIERS

- Lost sales
- Increased distribution costs
- Production overtime / downtime
- Inventory management issues

RETAILERS

- Missed sales
- Service level drop
- Missed / late deliveries increases
- Transport performance issues
- Supply issues

SHOPPER

- Products not available
- Disappointment
- Frustration with retailer

January Review

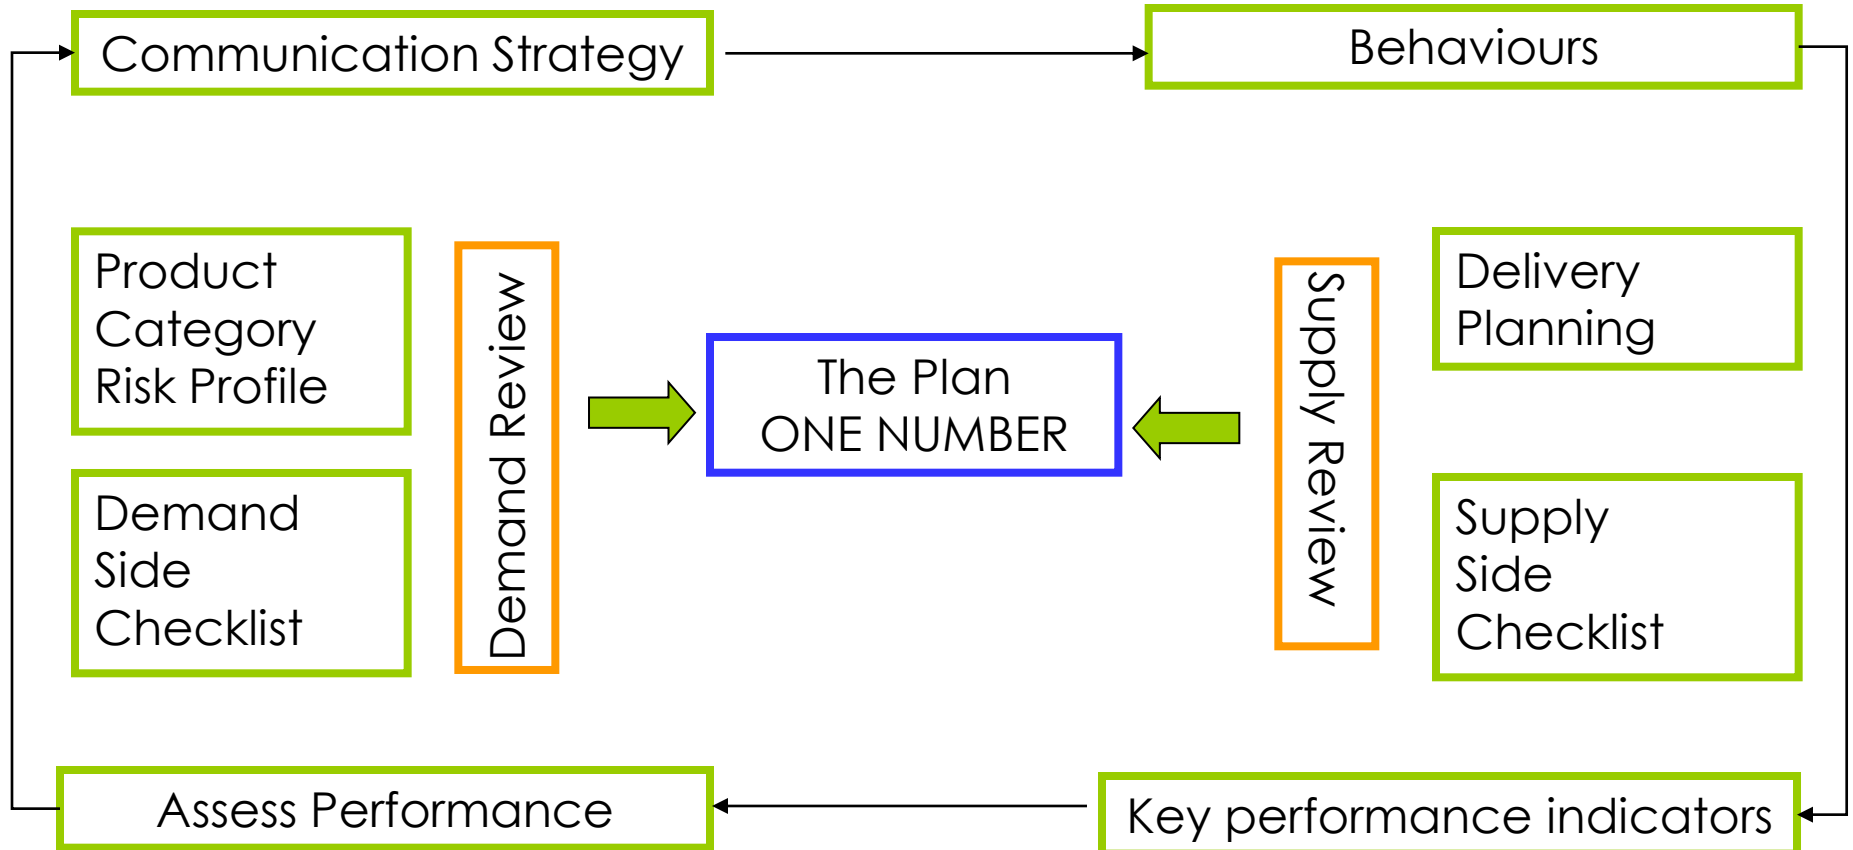

Key Focus Areas

Plan, plan, plan and plan again
Focus on one number
Daily responsiveness
Understand your trading partner
Operational flexibility
Communication plan
Contingency planning

Planning for January

Checkpoint:

Although January has a range of specific attributes and this Toolkit has been designed to deliver an improved product availability for this month the detail provided is equally applicable to the remainder of the year. The January plan should be a subset of an overall summer seasonal plan.

January Planning Calendar

The January planning calendar is a guide for planning the key milestones delivering excellent availability for January. It details specific goals; considerations and checklists for use by suppliers and retailers at each stage. The degree to which the engagement process with trading partners is undertaken will be determined by the trading partners and is dependent on factors such as product risk; supply chain complexity; and previous results.

Who:

Supplier: Sales,
Marketing, Production,
Planning, Supply Chain

Retailer: Buyer,
Merchandise
Supply chain.

Product/Category Risk Profiles

Some products and categories will be particularly susceptible to issues in January. At the outset it is valuable to identify which products are at greatest risk (internal and external) of experiencing issues that drive non-availability. Understanding the level of risk facilitates prioritising and strengthening contingency plans for such products.

Who:

Supplier: Sales,
Marketing, Production,
Planning, Supply Chain

Retailer: Buyer,
Merchandise
Supply chain.

Product Risk Profile
Questionnaire

Checkpoint:

Historically the following categories have an increased risk during January and require greater focus and flexibility. **Cream; Drinks;** However without planning, implementing and controlling the fundamentals of service level, speed, and optimisation low risk products and categories may be impacted.

Demand Side Checklist

There are many considerations to be incorporated into a successful January plan, some of these are lead by retailers, some by suppliers, and others can only be developed through joint planning – particularly where promotional dynamics and decisions are key.

Ensuring that these considerations are discussed, and included alongside companies internal demand planning processes, will assist to optimise demand side planning for January.

Who:

Supplier: Marketing,
Sales, Supply, Production

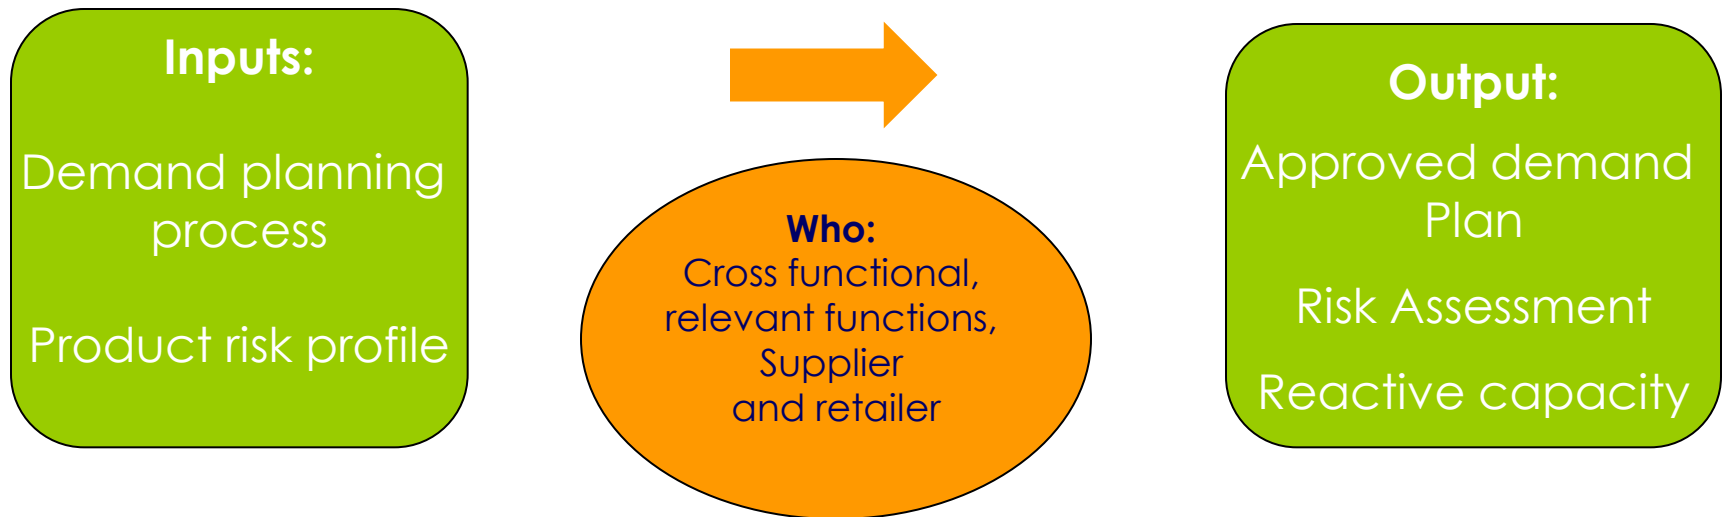

Retailer: Buying,
Merchandising,
Supply Chain

Demand Side Checklist

Demand Review

The demand review incorporates all demand side inputs and identifies the proposed sales volumes and timings. In the case of January demand planning, this should not only incorporate the outputs of a suppliers demand planning process, but also consider the product risk profiling outcomes. It must ensure demand and supply are in balance; the customer demands are met by the companies ability to supply.

Supply Side Checklist

There are many considerations facing suppliers when developing plans to ensure supply through the month of January given the particular challenges this period presents. Ensuring that these considerations are discussed, and included alongside companies internal supply planning processes, will assist to optimise supply side planning for January.

Who:

Supplier:
Supply, Production, sales

Supply Side Checklist

Supply Review

The purpose of the supply review is to create an achievable supply plan based on the agreed demand plan. This involves review of supplier capacities and detail procurement, manufacturing and logistics plans and consideration of the challenges presented by January.

Delivery Planning

■ Retailers to complete and send to suppliers

■ Suppliers to complete and send to retailers

Communicate DC opening hours, delivery plans and capabilities prior to season:

**Retailer DC Goods
Receipt Hours**

The Plan

One set of numbers used horizontally across the business departments and with trading partners becomes the basis for decision making. The number should be vertically integrate such that management level reports translate directly to planning level activity. It should provide a common language for the business and basis for quantitative decision making.

Inputs

Approved demand plan
Supply plan
KPI's

Who:

Retail & Supply
buyer / seller
Supply Chain / Operational
Teams

Outputs

Approved actions
to meet demand
and supply plans

Checkpoint:

Does a change in the demand plan automatically translate to changes in purchasing and production requirements?

Do changes to purchasing /procurement plan link back to financial projections of expenditure and Inventory levels?

Communication

A key element for January plans is effective communication between all parties (up-stream supplier, manufacturers, retailers, transport providers) and excellent internal communication channels. It is this issue that is often not planned for adequately.

**Communication
Requirements Plan**
